WHELAN VIEW

VIRTUAL SECURITY OFFICER SOLUTIONS

Through our Strategic Technology Alliances, Whelan can deploy a myriad of technology tools to our security officers and security managers on the same robust and virtual WhelanVIEW platform.

This platform allows our officers to capture and report critical information from the field, while supervisors can track their exact locations. In turn, this presents you with an extraordinary "view" into your security operations. Being alerted electronically of incidents and events in the field within seconds of their occurrence, gives you the distinct advantage of being able to mitigate security issues in a timely and efficient manner. A general description of each WhelanVIEW tool and its associated features is described here.

For more information on our technology tools or to learn more about our premium security services, please call Whelan Security at 1-888-4WHELAN or visit our website at www.whelansecurity.com.

[V-Post] An interactive guard post management system used for communication between security officers, supervisors, managers, customers, and third party stakeholders.

- + Capture time and attendance data
- + Send customized alerts and notifications
- + Deliver and confirm post orders
- + Receive and deliver reports in real-time
- + Manage visitor information, keys, assets and materials
- + Replace paper and logbooks at the site

[V-Tour] A real-time, multi-function tour verification system, cell phone, and lone worker protection (alert) system that transmits valuable guard tour location data wirelessly and instantly via the Internet.

- + Access real-time information quickly and easily
- + Verify the presence of guard personnel online
- + Receive guard tour reports and incident alerts instantly
- + Respond to events that need urgent action

[V-Tracker] A handheld platform which combines V-Post, V-Tour, and V-Inspector. Effectively carry out and monitor your security guard operations, including post order delivery, incident reporting, guard tour verifications, quality of service verifications, post order delivery, voice communications, and GPS tracking.

- + Process and report key activity in real-time
- + Track personnel and verify locations
- + Automate processes for wireless information
- + Generate web-based alerts and reports
- + Trend incident reporting with pictures
- + Capture 'clean' information via input validation

[V-Inspector] A handheld field inspection and quality assurance system designed to assess and improve the effectiveness of security operations.

- + Document inspections with photos & signatures
- + Conduct inspections using customized templates
- + Spend more time in the field instead of the office

[V-Logistics] A handheld logistics and inspection system designed to improve the efficiency and effectiveness of logistics and property inspection documentation.

- + Capture delivery vehicle information in real-time
- + Process inspections defined and scheduled
- + Administer custom inspections of logistics personnel
- + Obtain signatures, photographs, notes, and other data
